

Documents Imported as Unmatched

Last Modified on 29/04/2025 11:35 am ACST

Any document automatically imported by CareRight shows as "Unmatched". Documents need to be matched to a patient after they are imported.

Currently there is no way to automatically match a document to a patient - this is a manual step.

Unmatched Documents

- By default, documents will be ordered by the "Updated at" parameter.
 - Users can sort documents by type.
 - Clickable column headers enable users to sort by patient, provider, date, status and notes.
-
