Correspondence Tab - Bulk Print (Global/Location/Provider only)

Bulk Print - Global/Location/Provider Interface

Bulk Printing allows for multiple letters to be sent to a single print job. All the Bulk Printing requests will come to the BULK PRINT tab.

Please refer to Bulk Printing for information on how to bulk print.

Bulk Print will list all the outgoing correspondences set to Bulk Printing for all locations/Selected locations (Location interface), or for the Providers.

These Correspondences can be **Show**, **Delete/Recall**(Only for failed correspondences), **Print**, **Followup,** or **Comment** from this tab.
