Measurements

Last Modified on 10/05/2019 12:47 pm ACST

Different types of patient measurement details can be recorded in this screen.

The types of patient measurements is defined by your System Administrator, therefore if a type of measurement is not visible please consult with your System Administrator.

From this screen you can:

- Add new patient measurements

- View patient measurement history

- View result graphs over a period of time.

To access a patient's measurements:

1. Search for a patient.

2. Click **Show**.

3. In the Main Menu, click **Measurements**.

   a. The Measurements screen will display, with the following values (if set up)

Type	Description	Example
Metric	This is the Metric available to record Patients data	Weight
Value	This is the most recent measurement value taken	75kg
Date Measured		20/08/2017 at 01:49PM
History (button)		

Type	Description	Example
