

Copy Coding From Admission

Last Modified on 25/05/2019 10:34 pm ACST

Currently after an admission has been discharged CareRight offers the functionality to copy values from a previous admission.

There are two options available:

- Coding from previous admission on
- Select from previous admissions

From the Patient Record:

1. In the Main Menu, click **Admissions**.
2. Select the relevant Admission from the Admission History section, then click **ARN** hyperlink
 - a. The Admission details will display.
3. Select **Copy From** (under banner).
4. Select **Coding from previous admissions**.
 - a. **Note:** will be the date of the admission before this admission.
5. This will copy the coded values across to the current admission, a message will advise if the copy is successful.

Important Notes:

- If the patient has no previous admission to copy from the button will be greyed out; and,
 - If there are existing codes against the current admission, these will be replaced with the 'copied' values and the DRG deleted.
-
