

Using Images

Last Modified on 10/05/2019 11:30 am ACST

About Images in CareRight

- Images can be uploaded into the patient record.
- These can then be categorised, compared or drawn on.
- CareRight allows you to upload multiple images by dragging and dropping them into the browser.

Filter and Search for an Image

- Use the filter at the top of the Image Gallery or the Image Comparison screen to display images matching the selection made.
- The free text search will search the image comments field.
- To search and filter images taken within a date range use the Search facility in the Image Gallery.
- Clicking **Search** shows and hides the search criteria.

Draw on an Image

- The Drawing tool allows you to mark up an image.
- You have the option of drawing and entering text.
- The magnify glass allows you to zoom in and out.
- Clicking **Save** keeps you in the Drawing tool, whilst **Exit** will save changes and take you back to the Image Comparison screen.

Please note: Once you have drawn on an image, you can no longer rotate it.

Adding Text to an Image

1. Click the **Aa** button (Text).
 2. Click on the area you wish to write text over.
 3. Type your text.
 4. Click anywhere on the image outside of the text area (else the text will not save).
-
