

Edit or Add a Diagnosis (After Admission has been created)

Last Modified on 23/11/2020 1:58 pm ACDT

Once a diagnosis has been added, it can be edited if required or more diagnosis codes can be added to the existing list.

1. [Search](#) for a Patient.
2. Click **Show**.
3. In the Main Menu, click **Admissions**.
4. From the list of admissions, select the **ARN** (hyperlink) of the relevant admission.
5. Scroll down to **Diagnoses**.
6. To edit existing diagnosis, select the **Edit** button next to the relevant diagnoses.
7. To add new diagnosis, Click **New** on the list of diagnosis.
8. Complete fields using the table below as a reference.

Field Name	Pick List Options	Description
Type*	<ul style="list-style-type: none">•Principle•Co-Diagnosis•Complication•Additional•External Cause•Morphology	Refer to your clinical coding expert for what value to select
Diagnosis*	<ul style="list-style-type: none">•ICD10/Generic list	This is a pick list of ICD10 or generic codes that is loaded/managed by your system admin
Condition Onset Flag*	<ul style="list-style-type: none">•Arose during admission•Present on admission•Not Reported	<p>Refer to your clinical coding expert for what value to select.</p> <p>This value can be set as a default in CR Administration> Admission Categories</p>
Priority	Auto-populated free text value (whole number)	<p>The system auto populates this value - the first diagnosis will be given Priority = 1, the second Priority = 2 and so on.</p> <p>However, you can override this default value.</p>

*indicates mandatory field

9. If the Type "External Cause" is selected, additional field values will need to be entered:

Field Name	Pick List Options	Description
Place of Occurrence	•ICD10 - Y range of codes	This is a pick list of ICD10 or generic codes that is loaded/managed by your system admin
Condition Onset Flag for place of occurrence*	Arose During Admission Present on admission Not Reported	This value can be set as a default in CR Administration> Admission Categories
Activity	•ICD10 - U range of codes	This is a pick list of ICD10 or generic codes that is loaded/managed by your system admin
Condition Onset Flag for Activity	Arose During Admission Present on admission Not Reported	This value can be set as a default in CR Administration> Admission Categories

10. Click:

- a. **Save** - to add the diagnosis to the admission
- b. **Save & Add New** - to add the diagnosis and return to the new screen to add another diagnosis
- c. **Cancel** - to cancel and save no changes

11. Any equal or lower priority diagnosis entries will be demoted in priority to prevent duplicate priorities.
