

Email - Overview

Last Modified on 07/06/2023 9:48 pm ACST

Overview

Email feature in CareRight enables the following:

- Email appointment notification to patients
- Email Messages directly to the patient by only selecting [email from a list of templates](#)
- Email Correspondence to a Professional contact.
- Email Correspondence to a Patient
- Email Assessments to Patients (Patient interactive Module)

It is important to let us know which of the above you are planning to use as we need to work with you on Implementing the above. Each have a different setup and config in the system.

Please refer to [Email Configuration](#) in the System Admin Guide for more information.
