

Reservations - Overview

Last Modified on 21/04/2021 1:36 pm ACST

Reservations allow you to reserve an appointment time without linking it to a patient. This is useful if you are offering an appointment time to a potential patient who does not yet have a patient record.

No patient is attached to the reservation, instead the Reservation is associated with your CareRight login. The reservation can be converted to an appointment for a patient at a later stage.
