

# Running Reports on the First of the Month

Last Modified on 25/05/2019 10:46 pm ACST

CareRight prevents you from running a statutory report within the current month. Due to a nuance with time zones, you need to wait until 12pm EST on the first of the month before running the report for the previous month.

So, if you want to run the report for admissions for November 2017, the earliest you can run this report is 12pm EST on December 1st 2017.
