

Viewing Historic Measurements

Last Modified on 10/05/2019 12:50 pm ACST

1. [Search](#) for a patient.
2. Click **Show**.
3. In the Main Menu, click **Measurements**.
 - a. The Measurements screen appears.
4. Click **History** for a measurement. The following information will be displayed:
 - a. A graph of historical measurements taken. Hovering your mouse over sections of the graph will provide actual dates and exact measurements; and,
 - b. A table history for that metric, including the measurement results, who entered the measurement and the date of the measurement.

Measurement Errors

If a measurement has been entered by mistake, or a misreading of the measurement has been represented, click **Strike**. Enter a reason for the strike and click **Ok**.

That particular measurement will be removed from both the displayed graph and the table.
