Radiation Oncology Billing

> This article is part of the systems administration guide. You will require administration access to view the pages mentioned in this article.

Radiation Oncology Billing items require specific price calculations for some items and a specific way to submit claims electronically.

Rebate Calculation

Similar to some Anaesthetic items some Radiation Oncology billing items rebates are **derived** based on quantity and a base price.

For example item 15236 can be billed for 2 to 5 treatments (fields). The price is calculated as "The fee for item 15221 plus for each field in excess of 1, an amount of $37.95". Item 15221 has the MBS 85% rate of $44.75.

If someone had 3 fields treated the MBS rebate would be calculated as $120.65 (37.95+37.95+44.95)

To facilitate this all rebate and private, fund prices will need to be pre-calculated with a new item created to represent each number of fields.

E.g.

15236/2

15236/3

15236/4

15236/5

Sending Claims

When claims are sent - derived fees are broken down to:

Services

Service ID	0001
Line Item Number	3063
Charge Amount	3350
Hospital Indicator	Y
Item Number	59
Patients Seen	01
Service Text	9988770W
