Perform an Assessment After New Patient Creation

> This article is part of the systems administration guide. You will require administration access to view the pages mentioned in this article.

The code below will perform an assessment after a new patient is created.

1. Create a New Patient Registration Form assessment with Code: PD-001
2. Publish and enable the assessment - check the code matches the code above PD-001 - if not change in the trigger script to match the assessment code
3. Add the trigger script via:
    a. Admin > Workflow > Trigger Classes > Patient > Scripts > New
4. Enter the Code below
5. Activate the Trigger script after adding to **Trigger Script** > **Patient**

================

CODE -START

================

```
// Set Assessment
var assessment = patient.add_assessment('PD-001');

// Perform assessment
if (assessment) {
  assessment.perform();
}
else {
  console.info("New Patient Registration Form was not found or is not enabled");
}
```

================

CODE - END

===================
