Current Appointment

> This article is part of the systems administration guide. You will require administration access to view the pages mentioned in this article.

The Current Appointment replacement variables give access to all fields on the Appointment create/edit screen. These are only available within Appointment Letters.

They use the current appointment for this patient, and can be generated from the Appointments module > Right Click on an Appointment > Correspondence

The Variable name matches the field on the appointment create/edit screen. e.g. { Current Start Date } = Start Date of the appointment

List of *Current Appointment* Replacement Variables:

- { Current Start Date } - Start Date

- { Current Start Day } - Day of the week e.g. Monday

- { Current Start Time } - Start Time

- { Current Start Time (12 Hour) } - Start Time

v6.71.4 Feature: Add Service Location Address in SMS template

The service location address now made available in the SMS template as a replacement variable.

This can be added to the template as

```
{{service_location.address}} {{service_location.suburb}} {{service_location.postcode}}
```
