Calendar Options

This article is part of the systems administration guide. You will require administration access to view the pages mentioned in this article.

Overview

Calendar options are a bunch of options to be configured by administrator, such as time, duration, status and etc.

The filed of content in the calendars will only be visible when the functions are enabled in the calendar options.

Notice

An appointment status cannot be disabled if it is used as one of the global calendar options default appointment statuses.
