

Data Model

Last Modified on 26/05/2023 8:48 am ACST

This article is part of the systems administration guide. You will require administration access to view the pages mentioned in this article.

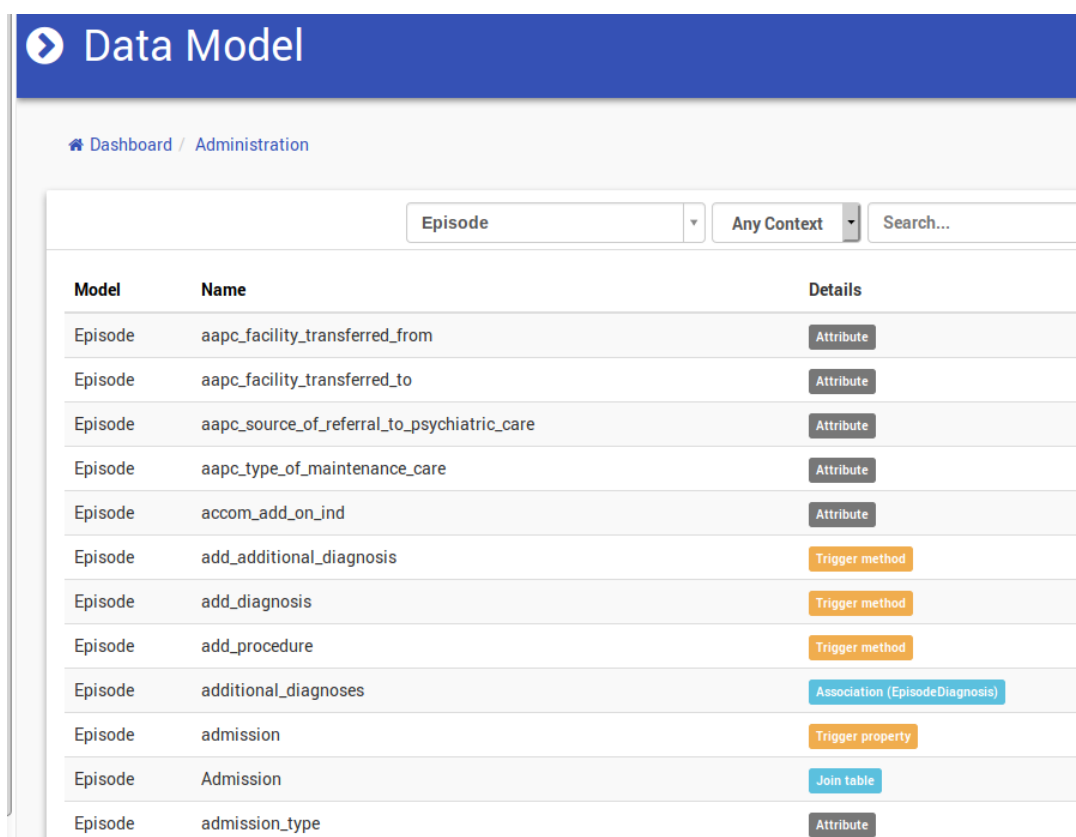

Displays a model of all data within the CareRight system. Information within the Data Model table is organised by Model, Name and Label. The table has the following features:

- Filter by model;
- Filter by context (i.e., datasets, templates or triggers); and,
- Search functionality.

To access the Data Model table:

1. Click **Administration**.
2. Click **Data Model**

Interface

The screenshot shows the 'Data Model' interface. At the top is a blue header with a play icon and the text 'Data Model'. Below the header is a breadcrumb trail: 'Dashboard / Administration'. The main content area features a table with columns 'Model', 'Name', and 'Details'. Above the table are three filters: a dropdown menu set to 'Episode', another dropdown menu set to 'Any Context', and a search bar labeled 'Search...'. The table lists 13 data models, each with a 'Model' type (all are 'Episode'), a 'Name', and a 'Details' button. The buttons are color-coded: grey for 'Attribute', orange for 'Trigger method', orange for 'Trigger property', and blue for 'Association (EpisodeDiagnosis)' and 'Join table'.

Model	Name	Details
Episode	aapc_facility_transferred_from	Attribute
Episode	aapc_facility_transferred_to	Attribute
Episode	aapc_source_of_referral_to_psychiatric_care	Attribute
Episode	aapc_type_of_maintenance_care	Attribute
Episode	accom_add_on_ind	Attribute
Episode	add_additional_diagnosis	Trigger method
Episode	add_diagnosis	Trigger method
Episode	add_procedure	Trigger method
Episode	additional_diagnoses	Association (EpisodeDiagnosis)
Episode	admission	Trigger property
Episode	Admission	Join table
Episode	admission_type	Attribute

New Joins (ver. 6.60 addition)

New Joins were added for:

- Episode → EpisodeProcedure (and vice-versa)
