

# How to enter patient nicknames or alias in CareRight without impacting Online Patient Verification (OPV)?

Last Modified on 25/09/2019 11:32 am ACST

A patient may have an alias or nickname that is different from the name that appears on their Medicare card. To record this without affecting OPV, you can enter this information under First Name Alias and Last Name Alias on patient's record.

 **Mr Test Testly**
