

Supported HL7 Message Formats

Last Modified on 01/05/2020 10:08 am ACST

The following HL7 message types are supported by CareRight via secure messages:

Sending

Letters generated from CareRight conform to the Australian Simplified Referral Level 1 profile (REF^I12).

Receiving

Letters:

- REF^I12 (HL7 version 2.3.1 or 2.4)
- REF^Z16 (HL7 version 2.3 or 2.4)
- Australian Simplified Referral Level 1 (HL7 version 2.4)
- MDM^T02 (HL7 version 2.3.1)

Radiology/Pathology Results:

- ORU^R01 (HL7 versions 2.3, 2.3.1 or 2.4)

Integration

The method of ingesting files depends on the messaging vendor. For more information see:
