

6.67.8 - Release Notes

Last Modified on 16/09/2020 4:24 pm ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with and how they impact on your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a RedMine ticket.

Release Notes for CareRight 6.67.8

Clintel Ref #	Summary	Changes	Reference	Manual Type
78321	Improved functionality of CareRight to support the processing of incoming messages from the API interface.	Allowed the receiving of Medicare Expiry dates from Health Directors, improved case matching between systems, and introduced a new identifier (ERN - External Reference Number) to support the efficient handling of TCID vales.	https://careright.knowledgeowl.com/help/patient-settings	SysAdmin Guide
78396	Introduced support for personal default calendar views.	Added a new field to the Edit Settings screen within the User Profile that enables all users to override the global default calendar setting and to select their own default calendar view.	https://careright.knowledgeowl.com/help/how-to-view-your-user-profile	User Guide
			https://careright.knowledgeowl.com/help/global-settings	SysAdmin Guide
