6.69 - Release Notes

About this Release

In each release there may be new features and functions that require one or all of the following:

· Purchase of a module to access

· User Training

· Specific process to be used to ensure correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with and how they impact on your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a RedMine ticket.

Release Notes for CareRight 6.69

Clintel Ref #	Summary	Changes	Reference	Manual Type
78658	Introduced new event-related feature	Users can now delete events in bulk using the new Bulk Delete feature. This feature can be assigned based on group-level permissions.	https://careright.knowledgeowl.com/help/events3	User Guide
			https://careright.knowledgeowl.com/help/groups	SysAdmin Guide
78659	Added support for defaulted after care option	When claiming item 105 (specialist follow-up consultation). CareRight now supports the capability to flag the item as "not normal after care" for Medicare.	https://careright.knowledgeowl.com/help/medical-providers	SysAdmin Guide
78661	Introduced patient account flags.	Administrators can now add patient account flags to patient summary screens. Flags can be used to highlight certain aspects of a patient account, such as bringing attention to certain types of accounts or used in reporting to identify customer-specific flags.	https://careright.knowledgeowl.com/help/accounts	User Guide
