6.71 - Release Notes

Last Modified on 21/12/2020 8:58 pm ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

· Purchase of a module to access

· User Training

· Specific process to be used to ensure correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with and how they impact on your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a RedMine ticket.

Release Notes for CareRight 6.71

Clintel Ref #	Summary	Changes	Reference	Manual Type
84750	Removed legacy messaging.	Updated the CareRight system to remove code used for SOAP message media. This has now been updated to REST message media for all customers.	https://careright.knowledgeowl.com/help/how-to-configure-message-media-from-soap-legacy-to-rest-within-careright	FAQs
84751	Introduced capability to manually indicate a cancelled patient Medicare card.	CareRight now supports the indication of a cancelled patient Medicare card. This enables CareRight to continue to use electronic claims processing even after a patient's death, until such time as a card is actually cancelled by Medicare.	https://careright.knowledgeowl.com/help/edit-a-patients-details	User Guide
84752	Added support for provider and location modifications in an invoice.	Admins can now toggle (on or off) a permission that enables users to change a medical provider and/or service location in an invoice.	https://careright.knowledgeowl.com/help/groups	SysAdmin Guide
84753	Simplified staff allocation process.	Admins can now easily add or remove staff member allocations via the locations interface, provider details screen, or staff member details screen	https://careright.knowledgeowl.com/help/allocating-staff-to-location	SysAdmin Guide
84755	Setting to provider to hide Appointment Comments on Dashboard	Provider based setting to hide or display the appointment notes in the dashboard	https://careright.knowledgeowl.com/help/hidedisplay-appointment-notes-for-providers	SysAdmin man
84756	Updated and refined how CareRight handles new billing invoices from an admission.	CareRight can now identify related IMC claims when they are billed from alternate service locations. Rulesets have also been introduced that enable CareRight to present relevant options for service locations and providers during the new medical invoice creation process.	https://careright.knowledgeowl.com/help/medical-invoices	User Guide
84825	Services	It enables CareRight to partition patient configuration for the delivery of multiple services	https://careright.knowledgeowl.com/help/services	SysAdmin Guide

| 84800 | Enhanced the account-related permissions to include more granular control. | Separated out advanced billing permissions from a single permission into five unique permissions. This enables Admins to have more granular control over user access to account-related functionality. | https://careright.knowledgeowl.com/help/groups | SysAdmin Guide |
