

## 6.71.4 - Release Notes

Last Modified on 15/03/2021 2:36 pm ACDT

### Notice to Clients

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with and how they impact on your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a RedMine ticket.

### Release Notes for CareRight 6.71.4

Clintel Task #	Summary	Changes	Reference
86529	New Feature for SMS Templates	Service Location information is attached to all Calendar sessions. You can now change your SMS Templates to include a Service Location Address <b>(Note:</b> This feature is only if a calendar session is a THEATRE appointment)	<a href="https://careright.knowledgeowl.com/help/current-appointment">https://careright.knowledgeowl.com/help/current-appointment</a> System Administration Configuration is required for this feature.
86530	Extension of bundled Service Claim Contract for Chemotherapy to support different PSG segments.	Claim Contracts were extended to allow defining different codes to be assigned . Two new fields created called "Bundled Accom Code" and "BundledTheatre Code". These fields will be used to populate the ACD segment instead of the existing service code and service code type fields. <b>(Note:</b> The existing Service Code and Service Code Type fields will continue to populate the SVB segment). If the Bundled Accom Code field is blank the Bundled	<a href="https://careright.knowledgeowl.com/help/contracts">https://careright.knowledgeowl.com/help/contracts</a> System Administration Configuration is required for this feature.

		Accom is set to AUTO then  when populating the ACD  segment the values from the  Service Code and Service Code  type will be used.	
86460	New Feature - Added Provider  Signature for Providers' Name,  Number or Signature (Title,  Initial)	Replacement variables now  include Provider's Name,  Number and Signature (Title,  Initial, etc).  Please Note: Signature is not an  image signature.	<a href="https://careright.knowledgeowl.com/help/replacement-variables2">https://careright.knowledgeowl.com/help/replacement-variables2</a>
