

Service Location

Last Modified on 05/05/2021 2:46 pm ACST

Overview

Service Locations are places where services are performed and billed against a specific provider number allocated to a Location.

Medicare requirement to reflect different locations for Medicare billing purposes. Each location can have one or more Service Locations. To be able to invoice there must be at least one service location.

Service Locations to be selected under specific Location and the default treatment type can be

- Rooms
- Outpatient
- Inpatient
- Procedure Centre

A non-admin user of CareRight has no permissions to add Service Locations. See [Service Locations](#) in the System admin guide for all information on how to manage the Service Locations.
