

Provider vs Medical Provider - Overview

Last Modified on 15/05/2025 3:27 pm ACST

The concept of Provider and Medical Provider are different on the basis of available roles and access in CareRight.

A provider can / have access to

- Statutory Reporting
- Calendar Sessions
- Cases
- Secure Messaging

Medical Provider can / have access to

- Statutory Reporting
- Calendar
- Cases
- Secure Messaging
- Medical Provider Details (Rate Details, service Location, Accounting details etc..)
- Prescribing information

Tip: If you are configuring medical providers and using Medicare, either set up a [PRODA](#) account or [find a form](#) to update your details with Services Australia as you complete this section.

Notes:

- Only a system admin user can add a new Provider or medical provider. See [Add a new Medical Provider](#) in System admin Guide
 - Both provider and medical provider can have user accounts in CareRight.
 - Creating a provider Or medical provider in CareRight will add a staff member to the system.
-
