

## 6.72 - Release Notes

Last Modified on 12/05/2021 2:15 pm ACST

### About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with and how they impact on your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a RedMine ticket.

### Release Notes for CareRight 6.72

#### Mandatory Statutory Reporting values with error - that are configured to be hidden will now be visible when you run the report!

Full article in CareRight User Manual: <https://careright.knowledgeowl.com/help/validation-errors>

In some cases, Admission Categories value that are configured to be hidden but are mandatory values for Statutory Reporting will have validation errors. For these hidden values, users are now shown and prompted which values and records require action.

For example: Care Type is a hidden field.

The screenshot shows the CareRight interface. On the left is a sidebar with a user profile 'Ben - CR - Test' and navigation links: Dashboard, Locations, Clintel Clinic, Statutory Reports, HCP, Report History, and Run Report. The main content area has a blue header 'HCP - Hospital Casemix Protocol (HCP)' and a breadcrumb trail: Dashboard / Locations / Clintel Clinic / Statutory Reports / HCP. A red error box is displayed with the title 'Failed'. The error message states: 'Task was unable to complete due to errors while processing the request'. Below this, three specific errors are listed: 'Statutory report records base Care Type not set for Admission 000501', 'Statutory report records base Discharge Intention On Admission not set for Admission 000501', and 'Statutory report records base Same Day Status not set for Admission 000501'. A final message says 'Unable to save patient snapshot for Mrs Maggie Peggy Carlson (MRN: 000002) on admission 10-Feb-2020 (ARN: 000501) due to validation errors.' and instructs the user to 'Click the continue button to return to the previous screen.' A blue 'Continue' button is at the bottom of the error box.

You can click on the admission link and edit and under Admission Category Configuration, tick Display Hidden Fields

#### Collect mandatory Theatre Information during Discharge

For full article in System Administration: <https://careright.knowledgeowl.com/help/theatre-data-collection-at-discharge?widget=false>

The new feature handles the ability to collect mandatory theatre information that cant be defaulted in the admission category during discharge.

Configuration required in [Global Settings Directory](#).

Admission: Theatre Data Collection at Discharge must be set: TRUE (default is False). "True" is when a patient is discharged, then the discharge screen will show additional fields that shall require mandatory completion based on [following rules](#).

**Enforced data collection for Day Procedures requiring Theatre upon Discharge**

Same Day status and Episode type are made mandatory in Discharge process.
