Admission Data Collection At Discharge

Overview

The global setting **Theatre Data Collection at Discharge** is renamed to **Admission Data Collection at Discharge** and if it is true, check that the admission has an Admitting Doctor selected at Discharge and if not then display the field to set the admitting doctor and make it mandatory. This is an enhancement in 6.73

(a) with Admission Data Collection At Discharge = False

1. admit without admitting doctor then discharge

   admitting doctor is blank and read-only on discharge, is this intended? *A: yes, this matches the previous behavior*

   discharges successfully http://cr.test.clintelsystems.com/patients/632/admissions/730

2. admit with admitting doctor then discharge

   admitting doctor is present and read-only

   discharges successfully http://cr.test.clintelsystems.com/patients/632/admissions/731

(b) with Admission Data Collection At Discharge = true

1. admit without admitting doctor then discharge

   admitting doctor is now editable, and blank

   validation is triggered, can't save without setting admitting doctor

   doctor set and discharges successfully http://cr.test.clintelsystems.com/patients/632/admissions/733

2. admit with admitting doctor then discharge

   admitting doctor is now editable

   discharges successfully http://cr.test.clintelsystems.com/patients/632/admissions/732
