TYRO - Manage Terminals at a Location
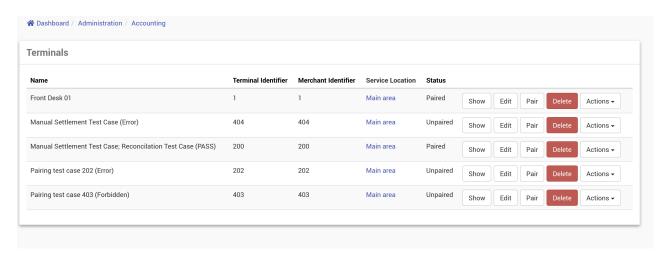

Last Modified on 06/01/2022 10:56 am ACDT

After you have the TYRO integration enabled, system administrators can then add one or more terminals to Locations.

To access the interface:

- Administration
- Accounting
- TYRO Terminals

Interface

System Administrators can view all terminals, as well as **add**, **update**, **remove** and **pair** terminals.

Create a new Terminal

To create a new **Terminal**, simply provide a descriptive **name**, as well as the TYRO supplied **Merchant Identifier**, **Terminal Identifier** information.

Indicate which **Service Location** the Terminal typically resides in.

It may be optionally tied to a specific **Medical Provider**. See TYRO - Manage Terminals for a Provider for more information.

Pairing a Terminal

After you have created a Terminal, simply click the **Pair** action and follow any physical instructions for your device.

If this operation is successful, the status will change to **Paired** and you are ready to start processing transactions.

Viewing Terminal Details

Clicking **Show** will bring up the terminal information.

Edit Pair Manual Settlement Delete

 Dashboard / Administration / Accounting

Terminal Status

Status: Failure: Forbidden (403).
