

6.77 Release Notes

Last Modified on 31/12/2021 3:29 pm ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Enhancement to disable appointment types in calendar sessions

System Administration > Appointment Types > Disable appointment types

Previously, if an appointment type had been used it was not possible to disable it within the system.

System Administrators now have the ability to disable appointment types; so that future appointments do not use an outdated appointment type.

Allowed Appointment Types Edit					
Allowed Appointment Types					
Category	Code	Description	Sort Order	Background Colour	Disabled
Consultation	CO	Consult	99		
Consultation	CSH	Consult (Short)	100		
Consultation	C10	Consult 10 mins	109		

Compact Line Items in Invoices

Some Guarantors, such as work cover, request printed invoices for multiple-day stays in a more compact form than the typical output.

In the limited circumstances this applies, there is now a new system permission, "Can compact line items when creating invoices"

Warning: Please ensure your use case for this feature is very clear, incorrect use may result in Medicare claims being considered invalid / rejected. As a result; this is disabled by default.

at least 20 m

☐ Compact Line Items
