6.78.3 Release Notes

Last Modified on 09/03/2022 10:29 am ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

· Purchase of a module to access

· User Training

· Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.78.3

Major Features

None

Enhancements

Medicare Web Services - Fixes

This release addresses minor bug fixes with the change over to Medicare Webservices.

- Move automatic ECLIPSE processing from 7am to 4am
- Invoices on loan accounts should not send patient contribution if present
- Allow OECs to be sent using the default Minor ID
- Tidy up display on online connection details for Medicare
- Web Services - Split processing and payment reports into separate requests during overnight status requests
- Performance: When the adaptor receives ~1000+ invoices to update, skip the full checks for linking admissions.
- Web Services: not receiving ERAs in overnight status requests

Other fixes:

- NoMethodError: undefined method `<' for nil:NilClass app/controllers/invoices_controller.rb:339:in

  `set_service_date'
- Adjust "Force SSL' deployment configuration for internal APIs
- Referral label selection for printing layout issue
