

6.78.4 Release Notes

Last Modified on 16/03/2022 3:31 pm ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.78.4

Major Features

None

Enhancements

Medicare Web Services - Fixes

This release addresses minor bug fixes with the change over to Medicare Webservices.

- Error when an IMC claim is generated without an medicare card number (overseas patient).
- Handle DVA payment report requests older than 6 months - now produces informative errors
- Display issue on adaptor IMC when claim is empty
- "Invalid string" - Failed transmission when transmitting an inpt claim - Guarantor reference too long
- VAED - separation date timezone issues
- NoMethodError: undefined method `reverse_receipt' for nil:NilClass when reversing receipt allocated to multiple patient accounts

Other fixes:

- Password expiry, LDAP accounts
- Support bundle on trying to cancel appointment.
- CME & NGO API changes

Datasets - All receipts / All refunds can be joined to transactions

In some circumstances, if joining *All Receipts* or *All Refunds* to the transactions table, invalid SQL could be generated.
