Medicare > IHC Claims > Ability to override Accommodation Status Codes

In some circumstances, when creating an IHC claim, the Accommodation Status Code will need to be overridden. For example, when the **Same Day Status** is set to **Non Admitted**, but the default behaviour of the system is to recommend Accommodation Status Code: A (Admitted).

Number of Days in Home Care	(Optional)
Number of Days of NonAcute Care	(Optional)
Date first symptoms appeared	(Optional)
Accommodation Status Code*	A

Users can now specify valid values in this scenario.
