

6.78.5 Release Notes

Last Modified on 01/04/2022 6:43 pm ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.78.4

Major Features

System Administration > Assessments > Before Save Trigger Scripts

<https://redmine.clintelsystems.com/issues/92929>

For complex assessments, you can now use the Trigger Scripts capability to fire events on *Save and Continue*.

Trigger	Before Save
State	
Name	Manual Script
	Before Creation
	Before Edit
Description	Before Save
	After Approval
Version	1.0
Order	10

Code

```
1 console.log('Hi from before save!')
2
3 // to prevent a save, you can halt the script immediately:
4 if (assessment.cb1) script.fatal('do not check the checkbox')
5
6 // or, act like validation:
7 if (assessment.text1 === 'NOPE') assessment.add_error('text1', 'must not be set to "NOPE"')
8
9 // or, validation but not on a specific element
10 if (assessment.text1 === 'NOPE') assessment.add_error('something is wrong with your form')
11
12 // instance values can be edited here.
13 assessment.text1 += '🐼'
```

Enhancements

PCI claims: Use service location provider number override if present

<https://redmine.clintelsystems.com/issues/92940>

In some cases, certain providers were not configured with their own identifiers and did not fall back to the service location provider numbers.

Claim Contracts > IHC stepdown pricing with different stepdown codes

<https://redmine.clintelsystems.com/issues/92944>

CareRight now better supports certain IHC configurations.
