IHC - Editing Accommodation Code

Last Modified on 05/04/2022 1:38 pm ACST

In some cases, the Accommodation Status Code may not reflect the actual circumstances of your treatment of a patient.

In these scenarios, you can visit IHC Invoice > Claim (non-express) > Create New Claim (if required) > Next

You will be presented with the ability to override the Accommodation Status Code.

You may wish to do this for scenarios likes:

- Same Day treatment, where a patient is not admitted
- When directed by Medicare to submit alternative accommodation codes.
