6.80 Release Notes

About this Release

In each release there may be new features and functions that require one or all of the following:

· Purchase of a module to access

· User Training

· Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.80

Major Features

Health Identifiers Service - Conforming implementation

CareRight is now certified as having a conforming Health Identifiers implementation; a key step in the roadmap to MyHealthRecord integration.

Tomcat 7 version upgrade

https://tomcat.apache.org/tomcat-7.0-doc/changelog.html

Tomcat is now 7.0.109

Java version upgrade

CareRight now uses OpenJDK 17.

Note: Customers must have no pending medicare requests that require use of the legacy eclipse adaptor.

https://redmine.clintelsystems.com/issues/92926

Mirth version upgrade

CareRight now uses Mirth Connect 3.7.1.

Note: Customers using Mirth are encouraged to test extensively prior to production deployment.

Enhancements

Datasets > Calendar Sessions > Inactive/Active column available

https://redmine.clintelsystems.com/issues/93169

Unbanked Transactions Report > Formatting

https://redmine.clintelsystems.com/issues/92963

A minor currency formatting error in certain totals has been corrected in the Unbanked Transactions Report.

Patient Records > Gender Diversity

https://redmine.clintelsystems.com/issues/92996

Patient records have the ability to capture and display a free text *Gender Diversity* - allowing patients to describe their sex vs gender identity.

Suggestions can be managed via the *Generic Codes* feature - Gender Diversity.

Supported in Label Printing, other areas.

Pathology & Radiology > Service Provider Setup > Ability to filter files in a specific directory

https://redmine.clintelsystems.com/issues/93569

Appointments > Legacy mode

Under global settings, there is now a "Legacy New Appointment" mode.

Legacy Appointment Advanced Search — true ▾

Legacy New Appointment — true ▾

This prompts with the calendar to view on clicking new appointment, rather than by searching.

Defects resolved

- Medicare - the inpatient medical claim button should not show up if service location is not: inpatient procedure center
- Medicare/ECLIPSE claims which include a service claimed on behalf of an assisting provider are now sent with Referral Override = "Not Required" instead of with the same referral details as on the primary service.
- ActionView::Template::Error: undefined method `self_or_converted_statement' for #<Statement:0x00007f96855696e0>
- Inpatient - Batch claim should refuse to send if missing facility ID
- NoMethodError: undefined method `refunds_path'
- Smart Form - Print Time incorrect on footer

Unable to send the batch due to the following errors:
Service Location 93338 (Inpatient) is missing a Hospital Provider Number

Invoices

Invoice	Reversed	Medical Provider	Batch	Invoice Date	Mrn	Client	Invoice Total	Paid Amount
2101		Dr Juan KRILL	202204#0045	21/04/2022	0000001050	Luke Alford	$188.00	$0.00

- Handle non-CareRight (ie: Thelma from external system) transactions in ERA - previously just errored.
- Single Sign On Failure: Username starting with underscore not permitted
- MCOL: Assistance items should not use the servicing provider's referral
- Assessments: Dynamic text references to lookup picker and select list does not work after approval

- Improved error messages when viewing a provider's calendar in the wrong calendar view
