6.81.2 Release Notes

About this Release

In each release there may be new features and functions that require one or all of the following:

· Purchase of a module to access

· User Training

· Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.81.2

In this article:

- Major Features
  - Programs > Attendance > Perform Assessments
  - System Administration > Appointment Triggers > Status Trigger
- Enhancements
  - System Administration > Program Categories > Associate an Assessment
  - System Administration > Admission Categories > Add option to exclude admission categories from all statutory reports
  - Clinical Notes > Split 'editing' and other roles
  - Program Admissions > Directly link to the Program Session
  - Program Attendance > Available in Triggers
  - QHAPDC & Admissions > Palliative Care Days & Coronary Unit Charges
  - Defects Resolved/Minor Enhancements

Major Features

Programs > Attendance > Perform Assessments

When a patient attends a Program, staff taking attendance now have a one click way to quickly complete an assessment.

This allows the full capabilities of the CareRight assessment engine to be used, to do anything from creating clinical notes to functional assessments.

Enhancements

System Administration > Program Categories > Associate an Assessment

When running a program, you can now associate Assessments to be conducted for each Attendee. This is useful for session specific notes or activities.

Click here to view the updated Guide.

Program Categories

| Name	Description	Enabled	Associated Assessment Name	
Anger Management Support!	John runs a "Anger Management Support" program. This program is a drop in program run Wednesday mornings. There is no end date from the program. Each week the attendance can vary with few regular attendees. This program is a follow up for patients that have completed a more substantial program and looking for additional support.	●	ANGRY	Edit Manage

System Administration > Admission Categories > Add option to exclude admission categories from all statutory reports

In some circumstances, friends or family members may be 'admitted' to a facility for audit and tracking purposes.

As these are not the style of Admission that would be reported to a Statutory Reporting body, there is now the ability to exclude certain categories from reporting.

Click here to view the updated Guide.

Clinical Notes > Split 'editing' and other roles

We have allowed in limited circumstances the ability to edit an already approved clinical note.

Click here to see the updated Guide

Program Admissions > Directly link to the Program Session

When checking attendances to admit patients, it is now easier to see the exact session they attended.

Defects Resolved/Minor Enhancements

- Send CodeVersionDate rather than CodeVersion for ICD-10 12th Edition, to work around 3M Grouper issue.
- Fix hint on IHC claim > Gender
- Patient Record Export - Error: no implicit conversion of File into String
- Patient Record Export - Dates are UTC
- Patient Record Export - Add Pathology & Radiology
- Datasets: Aliases - adjustment_type refered to as Ad desc in dataset
- Allow ERA allocation when it includes non-CareRight transactions

- Export a Report available for non clintel users
