

Palliative Care Outcomes Collaboration (PCOC) - Configurations

Last Modified on 27/07/2022 3:03 pm ACST

CareRight supports [PCOC v3.0](#).

Configurations Required

1. Permissions Associated

System Admin > Users and Groups > Permissions

In order to activate PCOC data capture, users must be granted one of the following permissions:

☐ Allow view of PCOC information

☐ Allow edit of PCOC information

2. Location Configuration

In order to configure PCOC, you will have received a **Service Identifier**. This is set at the location level.

System Admin > Locations > Add [PCOC Service Identifiers](#)

The screenshot shows the 'Banksia Park Clinic' configuration page. At the top, there is a header bar with the clinic name and a 'script paper' dropdown menu. Below this is the 'Statutory Reporting' section, which contains a list of fields for various identifiers. The 'PCOC Service Identifier' field is highlighted with a red border and contains the value 'PCOC'.

Field	Value
Hospital Provider Number	
Hospital Type	Select a value
VAED Campus Code	
VAED Campus Prefix	
VAED PRS/2 Hospital Code	
HMDS Establishment Code	
PHISCo Facility Code	
QHAPDC Facility Number	
AAPC Hospital Identifier	
ISAAC Hospital Code	
TSMS Establishment Identifier	
TSMS Contracted Hospital Name	
PCOC Service Identifier	PCOC

3. Set Provider PCOC Identifier

Dashboard > Providers > Add [PCOC Team Identifier](#)

Section	Name	Enabled
demographics	pcoc_diagnosis	Yes

Disable

5. Configure Admission Categories

We recommend pre configuring a **Palliative Care** admission category, with an appropriate default.

Administration> Admissions> Admissions category, Set the below Data elements

1. Care Type: **Palliative Care**
2. Ensure the below fields are enabled;
 - a. Palliative Care Days
 - b. Palliative Care Status
 - c. First Admission for Palliative Care Treatment
 - d. Previous Specialised Non-Admitted Palliative Care Treatment
 - e. Coronary Care Unit Charges
 - f. Coronary Care Unit Days

6. Set Assessment to capture PCOC data

Clintel will make available a particular assessment and the associated trigger scripts; to allow day to day evaluation of Patients in palliative care.
