Deleted Tables

- f_ip_record - this has been renamed legacy_ip_record and will eventually be removed
 - This was previously used to join **admissions** to **f_line_items** but is no longer required. Joins such as:

```
admissions.arn = f_ip_record.ir_arn AND f_ip_record.line_ir_numb = f_line_items.ir_numb
```

- can be replaced with:

```
f_line_items.admission_id = admissions.id
```

Deleted Columns/Indexes

- providers.prescription_provider_number
- providers.prescription_script_authority
- f_associate.ass_auth_no
- f_associate.ass_cns

- f_associate.script_paper
- prescriptions.medical_providers
- f_line_items.line_ir_numb
- f_hold_lines.hold_ir_numb

Other

- f_associate.ass_presc_no, storing a Prescriber Number is deprecated in favour of provider.prescriber_number.
Correctly formatted numbers are copied to the new field automatically.
