Medications > Custom Drugs

Last Modified on 07/10/2022 11:31 am ACDT

This article is part of the systems administration guide. You will require administration access to view the pages mentioned in this article.

If your practice uses any custom medications, in order for the prescription to correctly load into My Health Record it must be associated with a recognised coding system; such as *PBS, AMT*, or *MIMS.*

Note: If your practice utilises MIMS, there is no further action required.
