# 6.84.1 Release Notes

Last Modified on 05/12/2022 10:44 am ACDT

### About this Release

In each release there may be new features and functions that require one or all of the following:

· Purchase of a module to access

· User Training

· Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

### Release Notes for CareRight 6.84.1

**In this article:**

- Enhancements
  - My Health Record > Patient Merge > Close related HI Alerts
  - Prescriptions > MIMS > Allow Non PBS prescription in place of streamlined authority
  - Datasets > Tasks available
  - New Permission > Technical Support
  - Pathology & Radiology Results > Change to sort order, Completed & Followup Tabs
  - Defects & minor enhancements

## Enhancements

**My Health Record > Patient Merge > Close related HI Alerts**

Where a HI Service Alert is present for duplicated patient records, now when patients are merged these will automatically close off where that is the **primary issue**. Where duplication and other issues are present, the Alert must be resolved seperately.

***Internal ref:*** *97098*

**Prescriptions > MIMS > Allow Non PBS prescription in place of streamlined authority**

When prescribing, in some scenarios clinicians may wish to prescribe a specific drug outside of the streamline authority situations.
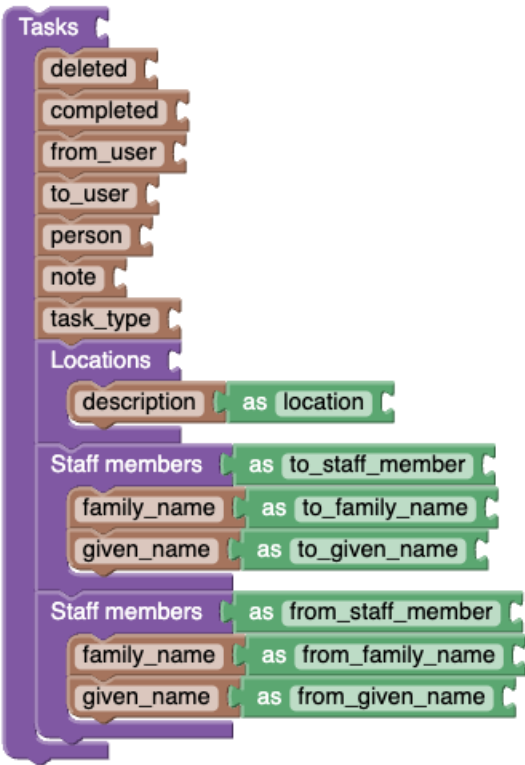

**Streamline Indicators**

| Id | Indication | Select |
|---|---|---|
| 4246 | Schizophrenia | ○ |
| 5611 | Acute mania Clinical criteria: * The condition must be associated with bipolar I disorder, AND * The treatment must be as monotherapy, AND * The treatment must be limited to up to 6 months per episode. | ○ |
| 5639 | Bipolar I disorder Clinical criteria: * The treatment must be maintenance therapy. | ○ |
| | Prescribe as non PBS / RPBS drug | ○ |

**Datasets > Tasks available**

*Internal ref:90066*

**New Permission > Technical Support**

Where your organisation has an internal technical support team, with appropriate change management and similar skills; we're gradually making available areas of the system previously requiring Clintel Support.

This will allow greater access, visibility and problem resolution capabilities for organisations.

Note, this should be **only made available** to authorised, appropriately trained users within your organisation. Misuse of functionality available here may be able to cause unplanned outages, data loss or other **high risk activities**.

**Pathology & Radiology Results > Change to sort order, Completed & Followup Tabs**

Pathology & Radiology results show **Abnormal** results prominently, to ensure they are followed up for patient safety. Now the **Complete** and **Follow** tabs change this behaviour to sort by most recent; as action has already been taken.

> *Internal ref:*90736

**Defects & minor enhancements**

- Aged Debtors - corrections to calculations involving allocations of funds.
- Clinical Notes
    - Reduced default height for smaller screens.
- Cases
