

6.86.1 Release notes

Last Modified on 23/03/2023 3:15 pm ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.86.1

In this article:

- [Enhancements](#)
 - [Uninvoiced Hospital Admissions > Now displays both attending and admitting doctors](#)
 - [System Admin > Lookup Tables > Preview dataset](#)

System Admin > Lookup Tables > Preview dataset

The system now will show friendly names of locations, guarantors, providers, service_locations when previewing.

On CSV download, it continues to show the raw identifiers (location_id, guarantor_id, etc)

Data	Service Location	Professional Category	Location	Guarantor	Provider
Hello	Main room	General Surgeon	Test	ACA Health Benefits Fund	Dr Example Smith

Medicare Online Requests > Ability to mark requests as Timed Out

Recently, we've seen the medicare web services endpoint experience outages. CareRight will now:

- Automatically time out any request still processing overnight
- Enable a control for users after an hour, to manually mark requests timed out.

Be aware, these controls should be used only during an outage.

Invoices > Ability to enter Invoice Other Reference

Where your invoicing processes have external numeric references, these can now be captured in invoice creation.

This is an optional field, previously part of the application but defaulted to 0.

Defects & minor enhancements

- Patients - Advanced Search - Ensure pagination
- System Clock not Synchronized error on Administration access
- Invoices - Fix issue with Multiple Theatre Rule not applying correctly when a bundled item is added to multiple theatre items
- Estimates - Fix issue with item number length
- NoMethodError: undefined method `guarantor_id=' for #<ActiveRecord::AssociationRelation []> activerecord (6.0.6.1) when creating via HL7 patient API
- Security fixes
