

6.88 Release Notes

Last Modified on 08/06/2023 8:50 am ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.88

In this article:

- [Major Features](#)
 - [ePrescribing & Real Time Prescription Monitoring](#)
 - [Correspondence - Add a Patient as a Letter recipient \(email\)](#)
 - [Patient Portal - Share a document securely with a patient](#)
 - [3M™ Grouper Plus Content Services \(GPCS\) - REST API now supported \(AU\)](#)
 - [Platform Upgrades - Ubuntu 22.04](#)
- [Enhancements](#)
 - [Patient Accounts > Private Accounts > Ability to override rates](#)
 - [Accounting Setup > Ability to model BPAY billing details](#)
 - [My Health Record - Session Lock and Timeouts](#)
 - [My Health Record - Warn for System Administrators without 2FA enabled](#)
 - [Medicare > IHC > Ability to enter in specific sender details per claim](#)
 - [System Admin > Appointment Types > Online Booking > Define a page to redirect to on booking completion](#)
 - [Clinical Notes > Search and Filtering](#)
 - [Attachments > Anti Virus Scanning Performance improvements](#)
 - [Defects & minor enhancements](#)

Major Features

ePrescribing & Real Time Prescription Monitoring

CareRight is now conformant with the [Electronic Prescribing 2.3 Conformance Test Specifications](#), and subject to further testing is aligned to [Electronic Prescribing 3.0.3 Conformance Test Specifications](#).

This includes RTPM such as QScript, SafeScript and other state based compliance requirements.

See the [ePrescription Overview](#) for more information.

Contact us today to discuss how you can prepare.

Correspondence - Add a Patient as a Letter recipient (email)

For customers with a secure email setup, correspondence can now be sent via Email directly to the patient. We strongly recommend review of [Industry recommendations](#) when considering this approach.

3M™ Grouper Plus Content Services (GPCS) - REST API now supported (AU)

Grouper is changing the integration method from a legacy technology, known as SOAP, to REST. It is recommended customers trial this prior to **October 2023**, where it will become the default mechanism.

To upgrade, simply visit **Administration > Admissions > Grouper Settings > Edit** and change the Send Method to "Rest".

If you experience issues, ensure your network environment whitelists:

- <https://anzgpcs.3mhis.com/Gpcs/rest/> - all urls prefixed with this should be whitelisted, so that future Grouper upgrades at not blocked.
- <https://anzgpcs.3mhis.com/GpcsSts/oauth/token>

Grouper authentication successful

Platform Upgrades - Ubuntu 22.04

CareRight will incrementally be delivered via the Ubuntu 22.04 Long Term Support release for all new customers. Existing customers will be migrated in the coming months.

Enhancements

Patient Accounts > Private Accounts > Ability to override rates

Where a private account is created, but you need to use a specific rate table (ie: a health fund's rates, or a particular rate for that individual patient); the system now allows you to opt in to overriding rates.

☐ Always the service provider for their own accounts

☐ Enable rate overrides for private accounts

☐ Item is not normal after care by default

TYRO Merchant Identifier

☒ Use Terminal's MID instead

Accounting Setup > Ability to model BPAY billing details

CareRight supports the ability to generate BPAY billing references. BPAY can be set at either:

- Practice wide
- Medical Provider level
- Service Location level

BPAY	
	<input checked="" type="checkbox"/> BPAY payments are accepted by this practice
Biller Code Specified at	Practice
BPAY Biller Code (Practice)	45896623

BPay references are generated as a combination of invoice number, patient MRN and a check digit.

Templates can be customised with the following variables

- invoice[bpay_crn]
- invoice[medical_provider][bpay_code]
- invoice[service_location][bpay_code]

My Health Record - Session Lock and Timeouts

CareRight now implements *SEC-0081 Session lock and termination* of the *MyHealthRecord Security and Conformance Profile 1.0*.

This lowers the general system timeout to 15 minutes for areas of the system where a patient's My Health Record is accessed.

Your session is due to expire due to inactivity in about 1 minutes

Attachments > Anti Virus Scanning Performance improvements

When uploading, the anti virus scanning is now queued; and an attachment is marked as *safe* when the process is

complete. For a short period, documents may display as a link but not be available for download.

Defects & minor enhancements

- Age Debtor - Use Allocation Date
 - Medications > Correspondence > Letter templates - Remove end date, show generic name
 - Medications > Current Medications > Show instructions, improve layout
 - Medications > Current Medications > Improve Button layout
 - Date of Procedure in Admission for QHAPDC
 - New Quick Account - Disabled at service location still shows provider
 - System Administration > Admission > Admission Categories - minor usability improvements, relax assessment types that can be associated for billing purposes
 - System Administration > Admission > Episode Diagnosis Codes - minor usability improvements
 - System Administration > Admission > Cancer Site Rule Sets - minor usability improvements
 - Online Booking
 - Avoid showing closed locations in Online Booking Location selection
 - Performance enhancements - omit inactive appointment types, calendar sessions
 - Ability to disable the 'existing patient' functionality
 - Cater for existing patients with no contact detail
 - ActionView::Template::Error: wrong number of arguments (given 0, expected 1)
 - Upgrade PDF rendering library
 - Search function not working under Providers - Disabled tab
 - Events > Fix date search
-
