Share a document securely with a patient via Email:

CareRight has ability to dispatch the pathology and radiology requests automatically to patients via email. Previously, there was only print option available in the screen.

- The patient has email clinical consent set.
- Secure SMTP configured.
- User can send a link with a secure token which includes patient detail and document detail, that expires as per Branding Settings > Expiry.

Patient - > document - > View a specific (pathology/radiology) result

The screenshot displays the CareRight web application interface. At the top, there is a navigation bar with tabs: REPORTED (active), REQUESTED, FOLLOW UP, COMPLETE, and DELETED. Below this, a breadcrumb trail reads: Dashboard / Patients / Miss Beverly MORGAN. The main content area is titled 'Documents' and contains a table with the following data:

Provider	Location	Type	Date of Document	Notes	Updated At
	Adelaide	General Document	01/06/2023	Test	01/06/2023 at 02:16 PM (+0930)

To the right of the table, there is a 'Show' button with a dropdown arrow. A dropdown menu is open, showing the option 'Send By Email'.
