

Transport & Transport Charges in IHC Claims

Last Modified on 27/06/2024 11:57 am ACST

Accounting and Item Setup

Refer to [Limit Item Types Available for Invoicing](#) and [Item Types](#).

Model your common Transportation charges with an Item Type of **HCP Transportation**.

This will allow you to raise specific invoices for costs incurred during an admission.

Recording details of Transport

Where you need to record specific details of patient transportation either to or from your location, it is possible to record this directly on the Admission.

This in turn populates into the IHC Claim.

Transport

Ambulance Reference Number

Ambulance Reference Number must only contain alpha, numeric characters, spaces, apostrophes, hyphens, and other special characters (/ , . :) and must contain at least one alpha or numeric character. Spaces must not appear before or after other spaces or the supplied value., Ambulance Reference Number is too short (minimum is 1 character)

Note that you need to ensure the **Date and Time** for the Transport segment matches up with the **Service Date** on the item on the invoice, where multiple transportation claims are made.

Note that Transport information will not be included if there is no corresponding item invoiced. If you need to submit transportation details with no charge, we recommend billing a \$0 item.
