

6.90 Patch Releases

Last Modified on 09/09/2024 2:28 pm ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.90.1, 6.90.2, 6.90.3, 6.90.4, 6.90.5, 6.90.6

In this article:

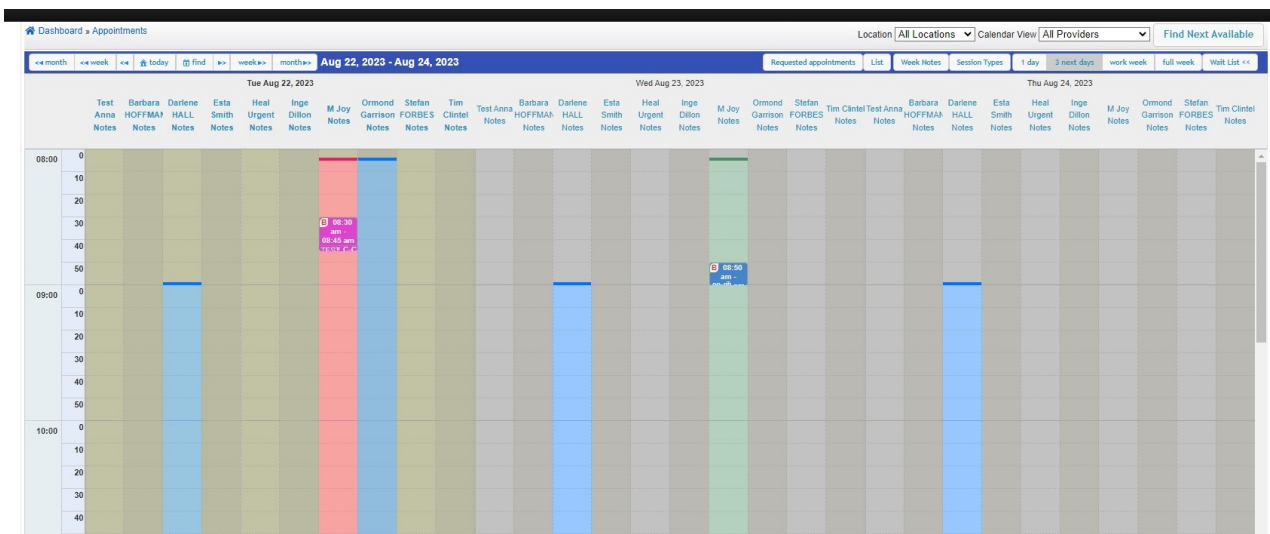

- [Enhancements](#)
 - [Calendars > Focus on specific location](#)
 - [Statutory Reporting > HMDS](#)
 - [Defects & minor enhancements](#)

Enhancements

Calendars > Focus on specific location

Previously, the Calendar System allowed the construction of a *Calendar View* which was a collection of providers. If you were a power user and connected to multiple locations; as well as one of those providers operating across multiple locations; it would be possible to create a calendar view that showed unnecessary information.

We have now added a Location filter, defaulting to All Locations, for this scenario.

Statutory Reporting > HMDS

Following written advice, WA Health has requested HMDS data to be submitted in the previous format (2015-2023).

Note: Customers will receive this change as a settings change, or in any releases equal to or higher than 6.90.2.

Defects & minor enhancements

- Administration
 - Correspondence > Message Types - Don't allow deletion for message types that are active/defaulted, and general UX improvements
 - Admissions > Admission Categories > Setup - Don't allow a field to be marked required and hidden unless a default value is set
- ePrescribing
 - Reduce restrictions for Section 8 medications vs NSW Authority Permit
 - Fix Medisecure token setup
 - Fix Conformance ID
 - Move National Data Exchange setup to own screens
- HL7 > Referrals > Change behaviour for activating, deactivating
- Patient Export > Include attachments embedded in clinical notes in export
- PCOC > Phases > Validations - Fix issue where the first and last phase being the same, with a phase in the middle being different being flagged as wrong.
- Medicare > Fix issue with timing out requests
- Correspondence > Enable lists in the editor
- Audit logging - issue where current user is not a staff member.
- Database indexes
- Security - apply patch to Puma
- Fix report issue

6.90.5

- Fix Type C issue
- Fix issue with invoices with no line items
- Bump jsonpath from 1.1.3 to 1.1.4
- Fix unsafe redirect
- JQuery UI 1.13.0
- Fix crash
- If you aren't a staff member, don't show my health record warnings
