

## 6.92 Release Notes

Last Modified on 09/09/2024 2:28 pm ACST

### About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

  - [Defects & minor enhancements \(6.92.2\)](#)
  - [Defects & minor enhancements \(6.92.3\)](#)
  - [Defects & minor enhancements \(6.92.4\)](#)

## Major Features

### Telehealth with Covi

CareRight now integrates with the Covi platform, automatically publishing eligible appointments to their API. See [Telehealth with Covi](#) for more information.

If your organisation already uses Covi, get in touch to find out more.

## Enhancements

### Assessments > Electronic Signatures

Main article: [Smart Forms \(Assessments\) Overview](#)

Sign any Smart Form, assessments and more.

### Patient Summary: Semi-automated Online Patient Verifications

CareRight will trigger OPV requests automatically following changes to

- Medicare Numbers & IRNs
- DVA numbers
- Where a medicare number was verified more than 12 months ago

Where there are details for a patient and an OPV is possible, but has not yet been performed, the OPV control will appear as an *info/action needed* control.

Where an OPV is possible, but it could not be automatically verified by the system, the OPV button will appear as a *warning control*. Users should perform a manual OPV and review the details.

## HL7 > ADT\_A08 Messages > Next of Kin

CareRight now renders all Relationships and Next of Kin information in outbound HL7 messages.

See <https://hl7-definition.caristix.com/v2/HL7v2.5/Segments/NK1>

See [API Server - HL7 MLLP Messages](#)

## HL7 > ADT\_A08 Messages > Gender Diversity

CareRight now renders Gender Diversity as per

<https://confluence.hl7.org/display/VOC/Gender+Harmony+in+V2>

See [API Server - HL7 MLLP Messages](#)

## Admissions > Rehabilitation Care

It is now possible to capture relevant Rehabilitation care fields for IHC claiming.

- CaseMix Code
- CaseMix Code Type
- Mode of Inpatient Episode Start
- Mode of Inpatient Episode End
