

6.93 Release Notes

Last Modified on 09/09/2024 2:28 pm ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Major Features

Online Enquiries and Expressions of Interest

CareRight now features an *Online Enquiries* function, similar to [Online Booking](#). This functionality caters for general enquiries and pre-screening of potential patients, gathering referrals and support documentation from other organisations, or securely receiving data from your existing patients.

Main article: [Online Enquiries and Expressions of Interest](#).

Last Name *

ePrescribing with eRx

Adding to the e-Prescribing capabilities within CareRight, we are adding support for a second platform - eRx. CareRight is now certified to ETP Level 2 with eRx.

Enhancements

Experimental: Report generation improvements

We're modernising our report generation pipeline, and on a case by case basis will migrate some customers to newer generation techniques over the coming months.

Reconciliations > Payment Reports - Import BPoint or Stripe format receipts as a patient deposit/credit in bulk

Main article: [Import BPoint, Stripe or other external Patient Deposits & Receipts](#)

Where your processes request an upfront payment from your patients and this is externally managed to the CareRight system, such as via BPoint or Stripe,

Submit

We support BPoint and Stripe formats at this time, though may expand this to other platforms.

If you are using a third party platform but can transform your data to match the Stripe or BPoint format, this can be imported regularly into the system as well.

You will require:

- A unique external transaction identifier
- A patient CRN/MRN
- Dates and amounts
