

6.94 Release Notes

Last Modified on 09/09/2024 2:28 pm ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Entitlement updated successfully

Plan/Entitlements

Category	Start Date	Expiry Date	Available	Consumed	Total	
Medicare Mental Health Care Plan	22/12/2023	22/12/2024	9.0	1.0	10.0	<div><div>Edit</div><div>Use</div><div>History</div><div>Archive</div></div>

For customers who work with:

- NDIS Budgets
- Medicare Mental Health Care Plans
- Medicare & Allied Health Better Access Plans
- Medicare Eating Disorder Plans
- or need to track patient entitlements to programs

We have expanded our capabilities to track and manage usage. Combined with our Smart Form Automation and *Online Enquiries/Referrals*, this allows you to design *intake assessments for eligibility; track patient usage of a plan; automatically build invoices resulting from your consultations, & trigger workflows to measure outcomes.*

If you are interested in expanding or revising your processes to take advantage of these capabilities, contact Clintel to discuss your workflow requirements.

Enhancements

Appointments > Add support for Assistants in Consultation, and relabelling

Where your practice either:

- Performs surgery with primary doctors and assistant surgeons or
- Operates in a consultation modality, with teaching or multiple providers

You can now set up additional parties assisting with a particular appointment. For procedure appointments, users will notice we surface the assisting provider in the calendar views.

near_visual_acuity_left	Left eye Near Visual Acuity	No	Edit	Remove
add_right	Right eye amount of Additional correction needed to focus at close distance	No	Edit	Remove

Lookup Tables > Ability to import DBF files

In addition to supporting CSV, we now also support importing DBF files.

Lookup Tables > Autocomplete controls in Assessments

We've introduced a new *Autocomplete* control that allows for searching over very large datasets, and filtering to specific categories or criteria.

Infrastructure > Ability to migrate content to alternative storage tiers

We've revised our infrastructure offerings, to allow for infrequently used attachments to be moved to secure cloud "cold" storage.

This will be available to all cloud hosted customers, and on premise customers with appropriate solution design over the coming 12 months.

Defects & minor enhancements

- Automatically translate reserved column names when creating/using lookup elements
- SMS template - Support bundle error - Better handle malformed templates
- Fix NoMethodError: undefined method 'empty?' for nil:NilClass for address assessment element
- Add delayed job metrics now publish to appsignal
- Appointments - Ensure 'Assistant' can be translated
- Assessments - Add support for "Submit for approval" actions/trigger events
- Appointment types - Allow an Assistant to be added to a consultation appointment
- Require a claim contract is available when submitting a bundled IHC claim.

Release Notes for CareRight 6.94.1

Defects & minor enhancements
