

Lookup Tables

Last Modified on 28/10/2024 12:20 pm ACDT

Setting up and publishing a lookup table

We generally advise customers to work closely with Clintel to deploy an initial lookup table and structure; as well as documentation of where and how this is used..

Updating data

Ability to import DBF files

In addition to supporting CSV, Careright now also supports importing DBF files.

Lookup Data Sets

After importing a dataset into the system and marking it as current, Careright provides the capability to re-index the data into Elasticsearch. If Elasticsearch is enabled, users will find a button that allows them to initiate the indexing process with a simple click.

Data Sets				Import	
Lookup Data Sets				Search...	Q
	Current	Enabled	Last Indexed
