

Patient Assessments List

Last Modified on 12/02/2024 12:58 pm ACDT

Assessments can be run at many levels, the most type is a **Patient Assessment**.

Access via **Patient > Assessments**

You will be presented with a list view of all **Current** assessments, as well as the ability to [Run a New Assessment](#)

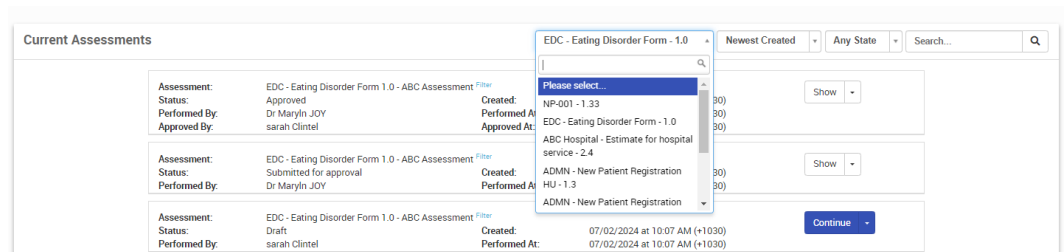

You can utilise the **Search** to filter for a specific assessment of interest, ie: DASS 21 by keyword.

You can choose to **Sort** by age.

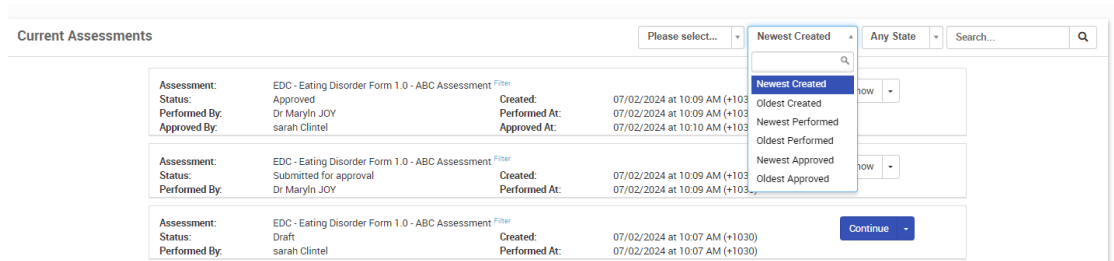

You can choose to show only assessments in a partial **State** (Draft, Submitted for Approval, Approved, Cancelled, Archived)

Filtering and Sorting of Assessments

Specific assessment can be searched by selecting list of current patient assessment from the drop down options.

Assessment content can by sorted by Newest | Oldest Created, Newest | Oldest Performed and Newest | Oldest Approved.

In addition, content can also be filtered by state:

Performed By:	Dr Marilyn JOY	Performed At:	07/02/2024 at 10:09 AM (+1030)

Filter icon

Users can filter the assessment by clicking on the blue filter icon. Upon clicking, a new tab will open displaying the current list of that specific assessment. Here, users can view who conducted the assessment, when it was conducted, and if there are any calculations present, they will also be presented in readable format.

You can utilise the **Filter dropdown** to see a list of **only** a specific assessment over time.

If your system administrator has configured [Assessment Summary Display](#) fully, you can see a list of key measurements.
