

6.98 Release Notes

Last Modified on 14/02/2025 9:03 am ACDT

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

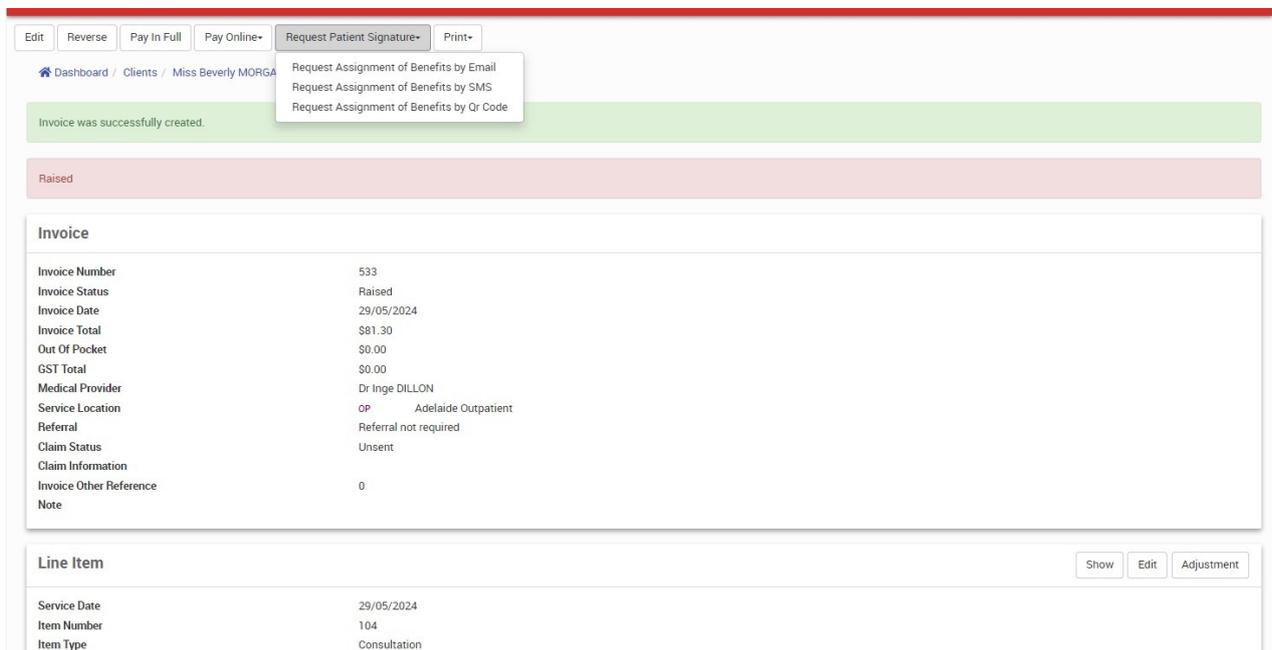

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Release Notes for CareRight 6.98

Major Features

DB04 Assignment of benefits ("digital signature") for use in Telehealth

CareRight now features a workflow for collecting a signed DB4 Assignment of Benefits PDF via a secure link. This improves telehealth claiming preparation, allowing a one click request for consent.

Patients receive a customisable notification:

On following the secure link; patients will be shown an appropriate claim form for either:

- Medicare Assignment of Benefits
- DVA Treatment Vouchers

Example signature requirements, Medicare DB4 Assignment of Benefits:

Signature

Patient, Parent, Guardian or other Responsible Person to complete

*Yes, I agree to the Assignment of the Medicare Benefits directly to the health professional

Name

Privacy Note:

Your personal information is protected by law, including the Privacy Act 1988, and is collected by the Services Australia for the assessment and administration of payments and services. This information is required to process your application or claim.

Your information may be used by the agency or given to other parties for the purposes of research, investigation or where you have agreed or it is required or authorised by law.

You can get more information about the way in which Services Australia will manage your personal information, including our privacy policy at servicesaustralia.gov.au/privacy or by requesting a copy from the agency.

Information about medical/dental expenses for people under the age of 18 may also be disclosed to adults on the same Medicare card, through taxation statements.

Patients may download a copy of the signed form for their reference.

Medication Management with EMMA

Main article: [EMMA Integration](#)

CareRight now integrates to publish admitted patient records to [emma](#), a full medication management and charting solution. Our current level of integration is in the *experimental stage*; and will be improved over time.

Your browser does not support HTML5 video.

Enhancements

Online Booking > Manage appointment confirmation or cancellation via secure link

CareRight now features the ability to share a confirmation email to patients, where they can elect to confirm or cancel an appointment. Unlike the existing SMS functionality, this paves the way for a full online patient portal.

Combined with an appropriate email template, patients can respond to their appointment to confirm or cancel.

Template

Code email-appointment-reminder-unconfirmed
Description Appointment Reminder - Unconfirmed
Used By email-appointment-reminder-unconfirmed
Subject [Hosp.Demo] Appointment Reminder - Unconfirmed
Body

The screenshot shows an email template for St CareRight Hospital. At the top, the hospital name and logo are displayed. Below this, a personalized greeting 'Hi {{patient.given_name}},' is followed by a message: 'Hi Your appointment is booked with {{appointment.provider_display_name}}. We are looking forward to seeing you on {{appointment.date}} at {{location.description}} {{location.address1}}.' A request to 'Please confirm your appointment.' is made, followed by a prominent blue 'Confirm Attendance' button. The bottom section features three columns of service highlights, each with an icon and a 'LEARN MORE' button: 'Best in the area 2023' (bed icon), 'Top Class Equipment' (monitor icon), and 'Fast Service, less waiting' (ambulance icon).

On following the link, the patient is presented with a basic screen of details. Over time, this will be further enhanced to allow patient sign-up, rescheduling of appointment and a full patient portal experience.

The screenshot displays a patient confirmation screen titled 'Your upcoming appointment'. It features a table with the following details:

Our Location	18 Dequetteville Terrace PARADISE SA 5075
Date/Time	20/05/2024 16:05
With	Darlene HALL

Below the table, there are two buttons: a blue 'Yes, I'm coming' button and a grey 'No, I can't make it' button.

Case Categories > Associate an Entitlement

Where a patient is undergoing a series of outpatient treatments via the Case management system, and this is associated with a specific plan or entitlement - ie, a medical mental health care plan - this is now possible to associate specifically with a case.

This is visible in appointments:

Case

Medical Mental Health Care Case - 39, Medicare Mental Health Plan (4/10) ▾

Update Appointment

Case Categories > Associate a Checklist

Main articles: [Case Category](#), [Checklists](#)

Cases now feature *checklists*.

Edit Hold Closed Cancelled

Dashboard / Clients / Miss Lady Smith / Cases & Programs / Testing checklist - 15

Case was successfully updated.

Case checklist example

✓ One ✕ Two ✓ Three!

Testing checklist - 15

Case Number	15
Case Category	Testing checklist
Reference	
Case Worker	Dr Darlene HALL
Location	ADL
Checklist	Case checklist example
Status	Open
Start	14/05/2024
End	

This assists in treatment with a series of steps, such as an onboarding initial assessment, and post treatment finalisation / PROMS.

Create Case Category Cancel

Appointment Types > Associate a Checklist

Main article: [Appointment Type Configuration](#)

Appointments now feature *checklists*.

This assists in tracking all pre and post appointment activities, such as bulk billing consent for telehealth or PROMs.

The screenshot shows the 'Appointment types' configuration interface. The form includes the following fields:

- Category:** Consultation
- Duration (minutes):*** 20
- Sort Order:** 17
- Background Colour:** #5441e9
- Text Colour:** #200c0c
- Associated Assessment Name:** Select from list
- Cool Down Period (working days):** 0
- Checklist:** A dropdown menu is open, showing a search bar and a list of options: Admission checklists (highlighted), Test Admission, No missing title, First Name, Private Admission, and Case checklist example.

At the bottom of the form, there are two buttons: 'Update Appointment type' and 'Cancel'.

Patient Search > Advanced Search > Search by Custom Patient Field

Main article: [Search Patient - Advanced](#)

We have experimentally added the ability to filter by custom patient field to Patient > Advanced Search.

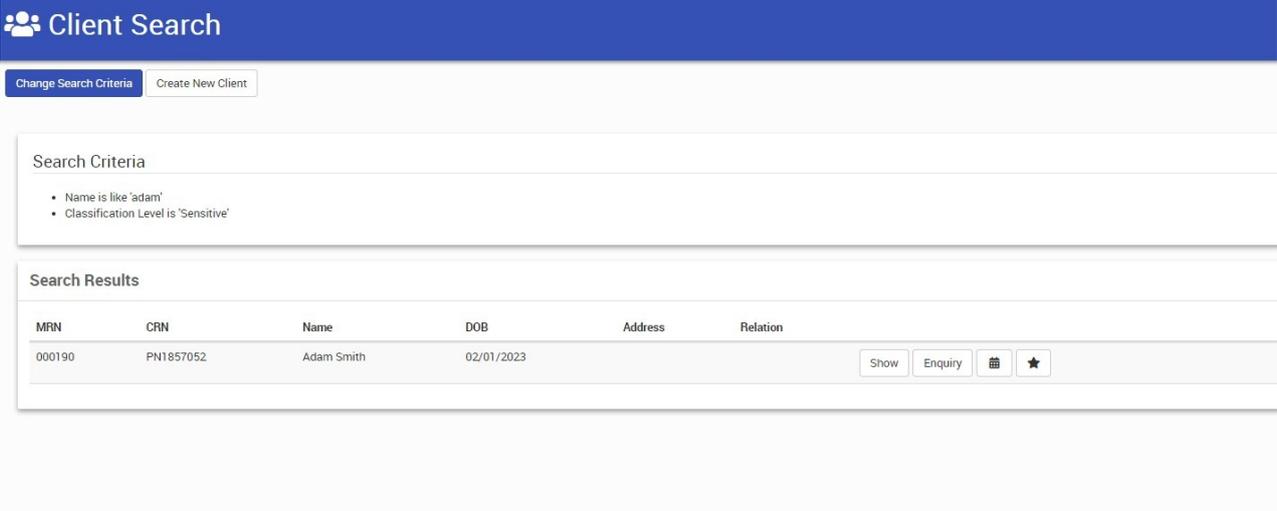

The screenshot shows the 'Client Search' interface. At the top, there are two buttons: 'Change Search Criteria' and 'Create New Client'. Below this, the 'Custom' section contains a list of search criteria, each with an input field:

- Gap
- Excess
- co-payment
- Next of Kin Contact Number
- Next of Kin Family Name
- Next of Kin Given Name
- Parent/Guardian Medicare Reference Number
- Parent/Guardian Given Name
- Parent/Guardian Family Name
- Parent/Guardian Date of Birth
- Next of Kin Relationship
- Medicare card Month
- test
- Medicare day
- VIP S
- VIP I
- VIP N

At the bottom of the form, there is a checkbox labeled 'VIP Boolean'.

Patient Search > Advanced Search > Search by Information Classification Level

Main article: [Search Patient - Advanced](#)

The screenshot shows the 'Client Search' interface. At the top, there are two buttons: 'Change Search Criteria' and 'Create New Client'. Below this is a 'Search Criteria' section with a list of criteria: 'Name is like 'adam'' and 'Classification Level is 'Sensitive''. The 'Search Results' section displays a table with columns for MRN, CRN, Name, DOB, Address, and Relation. A single result is shown for Adam Smith with MRN 000190 and CRN PN1857052. To the right of the table are buttons for 'Show', 'Enquiry', a calendar icon, and a star icon.

MRN	CRN	Name	DOB	Address	Relation
000190	PN1857052	Adam Smith	02/01/2023		

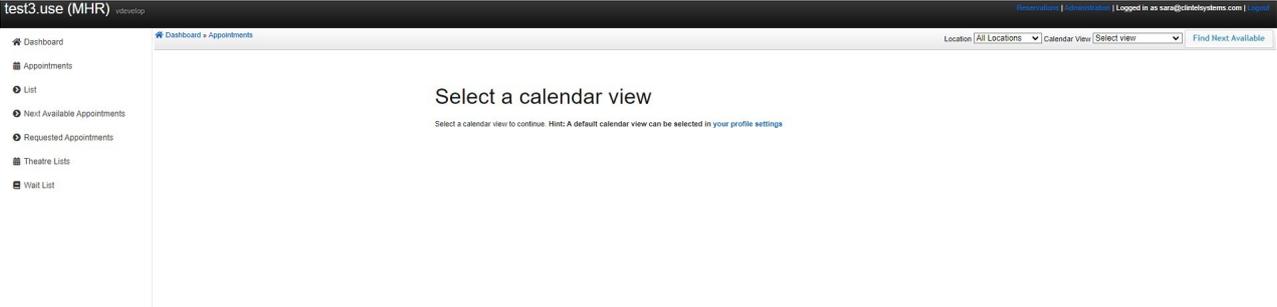

Admin > Calendar Options > Settings to disable "all providers" views for calendar for large organisations

Main article: [Calendar Options](#)

A new setting is available to disable the organisation wide view of providers. For customers with key staff operating across multiple locations, this can present a usability and performance issue.

Disable All Providers calendar view

When enabled, the system defaults to prompting users to select a calendar view. Users who have set up default calendar views will not be prompted.

The screenshot shows the Mirth dashboard interface. The top navigation bar includes 'test3.use (MHR) vdev/develop', 'Dashboard - Appointments', and user information 'Logged in as sara@cinetofsystems.com'. The main content area displays a prompt: 'Select a calendar view' with a sub-message: 'Select a calendar view to continue. Hint: A default calendar view can be selected in your profile settings'. The left sidebar contains navigation links for Dashboard, Appointments, List, Next Available Appointments, Requested Appointments, Theatre Lists, and Wait List.

Security: Upgrade of Mirth from 4.0.1 to 4.3.0

The following release notes are available:

- [4.3.0](#)
- [4.2.0](#)
- [4.1.0](#)

- [4.1.1](#)

Customers are specifically advised of

Updated Default Supported TLS Cipher Suites

In 4.3.0, the following weak cipher suites have been disabled by default:

- TLS_ECDHE_ECDSA_WITH_AES_256_CBC_SHA384
- TLS_ECDH_ECDSA_WITH_AES_256_CBC_SHA384
- TLS_ECDH_RSA_WITH_AES_256_CBC_SHA384
- TLS_DHE_DSS_WITH_AES_256_CBC_SHA256
- TLS_ECDHE_ECDSA_WITH_AES_256_CBC_SHA
- TLS_ECDH_ECDSA_WITH_AES_256_CBC_SHA
- TLS_ECDH_RSA_WITH_AES_256_CBC_SHA
- TLS_DHE_DSS_WITH_AES_256_CBC_SHA
- TLS_ECDHE_ECDSA_WITH_AES_128_CBC_SHA256
- TLS_RSA_WITH_AES_128_CBC_SHA256
- TLS_ECDH_ECDSA_WITH_AES_128_CBC_SHA256
- TLS_ECDH_RSA_WITH_AES_128_CBC_SHA256
- TLS_DHE_DSS_WITH_AES_128_CBC_SHA256
- TLS_ECDHE_ECDSA_WITH_AES_128_CBC_SHA
- TLS_ECDH_ECDSA_WITH_AES_128_CBC_SHA
- TLS_ECDH_RSA_WITH_AES_128_CBC_SHA
- TLS_DHE_DSS_WITH_AES_128_CBC_SHA

For more information on TLS Cipher Suite changes see the [4.3.0 Upgrade Guide](#). ([Community Issue](#))

Security: Upgrade of Mirth from 3.12.0 to 4.0.1

The following release notes are available:

- [4.0.0](#)
 - [4.0.1](#)

Customers are advised specifically of changes to supported TLS protocols.

Updated Default Supported TLS Protocols and Cipher Suites

In 4.0.0, TLSv1.1 has been disabled and the TLS protocols enabled by default are:

- Client Protocols: TLSv1.3,TLSv1.2
- Server Protocols: TLSv1.3,TLSv1.2,SSLv2Hello

Also, the following weak cipher suites have been disabled by default:

- TLS_RSA_WITH_AES_256_CBC_SHA256
- TLS_RSA_WITH_AES_256_CBC_SHA
- TLS_DHE_RSA_WITH_AES_256_CBC_SHA
- TLS_RSA_WITH_AES_128_CBC_SHA
- TLS_DHE_RSA_WITH_AES_128_CBC_SHA
- TLS_DHE_RSA_WITH_AES_256_CBC_SHA256
- TLS_DHE_RSA_WITH_AES_128_CBC_SHA256
- TLS_ECDHE_RSA_WITH_AES_256_CBC_SHA384
- TLS_ECDHE_RSA_WITH_AES_256_CBC_SHA
- TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA256
- TLS_ECDHE_RSA_WITH_AES_128_CBC_SHA

For more information on TLS Protocol and Cipher Suite changes see the [4.0.0 Upgrade Guide](#).

Security: Upgrade of Mirth from 3.7.0 to 3.12.0

The following release notes are available:

- [3.12.0](#)
- [3.11.0](#)
- [3.10.0](#)
 - [3.10.1](#)
- [3.9.0](#)
 - [3.9.1](#)
- [3.8.0](#)
 - [3.8.1](#)

Defects & minor enhancements

- Online Booking > Fix issue with stripe enabled appointment types not associated with custom assessment.
- Admin > Assessments > Remove print controls from preview of unpublished assessment
- Fix NoMethodError: undefined method 'scoped' for #<BatchAccount:0x000000001677c3b8>
- Unbank a refund
- Fix issue with metric error message repetition
- Fix NoMethodError: undefined method 'tr' for nil:NilClass in provider search with no term
- Remove MIMS formatting from eRx ePrescriptions, as eRx legacy technical stack fails silently.
- Fix issue with reservation visibility
- Paginate patient picker controls, to avoid user input that matches a very large number of patients.
- Fix issue with auditing when assessment uses patient_id field with a non numeric type.
- Admin > Warn if timezone is not configured on server correctly

- Measurements > Unstrike a previously struck measurement
- Measurements > If I strike something, it should be mandatory to explain why
- Photos > Preserve orientation flags when scaling.
- Security > Rate limit 2FA attempts further
- Fix bug with staff allocation and is_open? checks
- Security: Upgrade report runner dependencies
- Infrastructure: Fix pooling of report runner via AMQP
- Infrastructure: Fix pooling of clintel fop via AMQP
- Infrastructure: Minimum version postgres 15 for 22.04 deployments
- Ensure that if a correspondence snapshot has not been found within a certain period of time, this is considered a failure
- Prevent issue with invoicing from Admission where invalid content is present in copayment or excess fields (Cannot parse as Decimal)
- Add ABN to receipt and refund default templates
- Fix NoMethodError: undefined method '+' for nil:NilClass
- IHC Claim > Use specific accommodation type instead of episode type for patientClassificationCode
- Followups - Improve labelling
- Permission to Cancel, Archive or perform an Express assessment now reduced to *assessment_runner*
- Templates: Add line_item_gst_display variable to show item number, or "Non-Medical"
- IHC Paydown: Introduce better error behaviours and more detailed debug logging
- Security: Upgrade rack-contrib
- Support Bundle: Unable to upload documents in online enquiry process for unknown contacts
- Fix cancer notification back button issue for new, edit scenarios
- Fix redirection behaviour when a non authorised user attempts to access MHR tasks
- Fix grouping fails with uninformative error message
- Assessments > Image upload > When anti virus is enabled, display a placeholder until the image is approved
- Manual trigger script button appears to assessment runner when submitted for approval

6.98.1 Release Notes

Defects & minor enhancements

- ARIA billing wizard improvements
- Move submit for approval trigger after payment, if stripe payment required
- Fix for_restrict_sensitive_patients query efficiency issue

6.98.2 Release Notes

Major Features

Statutory Reporting updates for 2024-2025

Main article: [Statutory Reports](#)

- HMDS 2024-2025
 - Correct historical mapping issue with Mental Health Care Type
 - Gender now mandatory
 - Mode of separation now mandatory
- VAED 2024-2025
 - Add Diagnosis Cluster identifier (DCID) for implementation in 2025-26
 - Gender now mandatory. Users should update admission fields to mark mandatory where required.
 - Ensure S5 rehabilitation records are supported
- TSMS 2024-2025 - Customers should ensure they are coding with DRG v11, otherwise no changes to CareRight.
- QHAPDC 2024-2025 - No changes to CareRight.

Enhancements

Admission > Coding > Upgrade Grouper to 2024.1.3

We have updated the grouper version to 2024.1.3 as per advice from Solventum (formerly 3M Health)

Health Information Systems

Grouper Plus Content Services (GPCS)

Release Notification - version 2024.1.3

Health Information Systems continues to focus on improving our software to help you achieve Health Information Excellence.

In keeping with interface and content version renewal we are pleased to advise that on 31st May 2024, Solventum will update Grouper Plus Content Services (GPCS) to version 2024.1.3. There is no anticipated downtime for this release.

This version of Grouper Plus Content Services includes:

- Updated calculation of National Activity Based Funding (ABF) for 2024/25, effective 1 July 2024

To accommodate the change from Charlson score to Charlson Comorbidity for HAC complexity there are 18 new output fields for "Charlson comorbidity."

For these fields, see the GPCS AR Plus Inputs and Outputs.xlsx spreadsheet

- Fixed AR-DRG v5.1 or v5.2 Grouping Error

Error description: When grouping with AR-DRG v5.1 or v5.2 and in MDC 6 (Diseases and Disorders of the Digestive System) and procedure codes 35309-08 (open transluminal angioplasty) or 35309-09 (Open transluminal balloon angioplasty with stenting, multiple stents) are coded, the incorrect DRG (G02: Major Small & Large Bowel Procedures) was assigned.

As with all releases, please see spreadsheet GPCS_AR_Change_Log.xlsx for information relating to added/deleted/modified fields for the latest content version.

Important Release Notes:

Current release date: 31 May 2024

Current release version: 2024.1.3

	Version	Date supported until
Oldest interface version supported	v2022.1.x	27th June 2024
Oldest content version supported	v2022.3.x	27th June 2024

The above information is subject to change and is detailed in the GPCS Online Library.

Legacy Statutory Reports > Removal of ability to generate formats from earlier than 2018

For statutory reporting standards in effect prior to 2018, it is no longer possible to generate these legacy format reports.

Main article: [Custom Patient Fields](#)

We have enabled the ability to mark both built in and custom fields as required; *over and above the system default behaviours*.

The most common use case for this would be your clinical policies requiring an email and mobile phone.

Additionally, a number of built-in fields can now be hidden; for example, *Home Phone*.

Patient/Contact/Person Records > Ability to edit Home/Work/Mobile Phone Notes

We have enabled a previously read only UI to allow editing of notes.

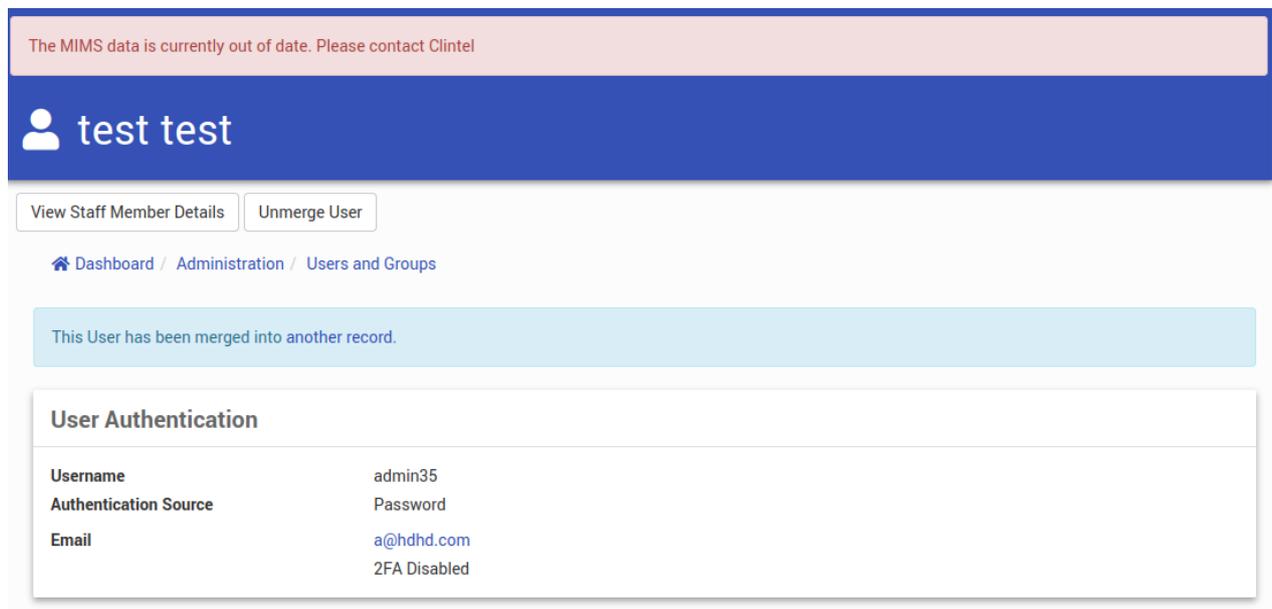

Demote a Medical Provider / Provider

Where a staff member is accidentally promoted to a provider, it is now possible to reverse this in limited circumstances.

Admin > Users and Groups > Merge two users

Where two user accounts exist, it is possible to now merge the users.

Providers > Edit a Provider > Change associated staff member

Technical support staff can now re-map a provider to a specific staff member.

Staff Member Category: Clinician
Staff Member Type: Doctor

Provider
Staff Member: Dr Demo Doctor

Statutory Reporting

Defects & minor enhancements

- Fix NoMethodError: undefined method 'include?' for nil:NilClass in app/models/dataset_block_handlers/clintel.rb:10
- Handle build current assessment failing with NoMethodError: undefined method 'trigger_context=' for nil:NilClass
- Fix disabling an enabled guarantor and with invalid theatre data
- Ability to demote a provider back to a regular staff member

6.98.3 Release Notes

Admin > Users and Groups > Edit a User > Change associated staff member

Technical support staff can now re-map a user account to a specific staff member.

Banking > Ability to mark transactions banked as at a historical date

When a user has the following permissions:

- ☑ Can alter transactions and receipts dates older than the current date

The system provides the ability to back-date banking.

Un-banked Select All

Date	Medical Provider	Guarantor	User	Patient	Type	Amount
<input type="checkbox"/> 13/06/2024	Dr Mary SMITH	Medicare	Mr Price Ben1	Mrs Maggie Peggy Carlson	Cash	\$500.00
Total						\$500.00
Selected Total						\$0.00

Bank Date 30/06/2024

[Bank Selected Transactions](#) [View Reports](#)

Defects & minor enhancements

- Ensure medical-objects root certificate added to trust store automatically in Ubuntu 22.04
- Reporting > Enquiries > Fix SQL generation with location filter
- Fix issue running enquiry assessment
- Add appointment set_location method for trigger scripts
- Add index on appointment ID for current assessments
- Calendar Session validation: Fix overlap logic when exempt
- Fix Psych::DisallowedClass: Tried to load unspecified class: Symbol
- Indexes for ICD Disease and ICD Procedure pickers
- Backport Permissions fix
- Fix create - error executing assessment - undefined method trigger_context=' for nil:NilClass`
- SAML authentication to set Primary display name
- Fix regression of count display
- Fix crash on upgrade of assessment templates
- Permission to view documents only needs to require view_own_providers, not view all.
- Professional contacts - Hide HI search button if HI Service is disabled

- Admin > Items > Import - Add setting GST true/false to bulk item creation
- Fix permission for cancel assessment for assessment runner
- Multiple Procedure Rule - Sorting Behaviour - Add option for "order of entry"
- Crash in Assessment Preview - Professional Contact Picker
- Handling for multi part ERA reports
- Assessments > Change to metrics behaviour, will not reload from patient record when submitted for approval
- Banking > Allow custom date banking
- Fix ActionView::Template::Error: undefined method 'all_template_elements'
- Ensure utf8 chars are removed when generating medicare reports
- Theatre HC21 form should only show theatre items.
- Coding printing error on HC21

6.98.4 Release Notes

Defects & minor enhancements

- Fix crash on entitlement without total set being edited by ensuring total is required
- Appointments .> Associated Case > Ensure translated
- Only allow duplication if not already on the first admission of the calendar year
- Case > New > Where a case category has an associated entitlement, start one
- Update IHC Misc Codes to 3.6 (2024-06-07)

6.98.5 Release Notes

Assessments > Appointment Picker > Better control of associated appointments displayed

Clone

Datasets > Line Allocation Logs > Change to base on SQL view

A number of columns were previously calculated server side, these are now pushed into the SQL view.

- adjustment_type
- amount
- payment
- la_adjust
- la_payment

Additionally, the SQL server view includes consolidated information from associated receipts or refunds (means, detail, note)

A new SQL view is available:

- v_line_allocation_logs

Defects & Minor enhancements

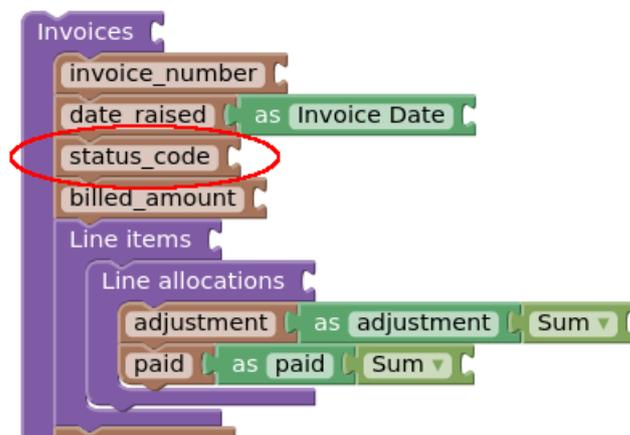

- Assessment Reports > Show associated case ID if applicable, patient id, location id.
- Fix issue with entitlement totals validation

- Change metrics to **only update on initial creation** of assessment
- Admissions > SNAP > Primary Impairment Type, default to no selection
- Audit logs: Sign in - Ensure SAML authentications are recorded
- Cancer Notifications > Regardless of validity allow deletion and undeletion
- Adjust criteria for IHI search initiation to document / correspondence creation date; not updated date and add SQL indexes
- Fix enquiry list timezone display
- SAML > Add specific Staff Member Type mapping for students
- Fix issue with exporting lookup table where column names do not match
- Online Booking > Appointments > Change behaviour when existing patient functionality disabled
- Enquiry tab displaying wrong time when location not clear

6.98.6 Release Notes

Datasets > Invoice Status Code

Add *Invoice Status Code* to display a human readable label for invoice statuses, such as **X** for **Cancelled**

Appointments > Capture cancellation reason

CareRight now optionally prompts for a cancellation reason, and provides the ability to report on why patients cancel. CareRight is prepopulated with the [Top 10 reasons patients cancel or no show](#).

This data is available in the *Appointments report*.

Defects & Minor enhancements

- Change clinical notes associated with an assessment to be marked **approved** when the assessment is approved; if the user has **note_approver** permissions
- Fix bug with metric elements in assessments, where the metric has multiple values and the patient has similar or identical previous measurements
- Medical objects sending - Make sure a MO routing ID can be used
- Fix regression with HC21 form outside of admission
- Add active/inactive split of service locations
- Minor fixes with printing current appointment

6.98.7 Release Notes

Datasets > Date fields > Preset filters

Adds filters for This Week, This Month, Last Month, Last 3 Months, Last 12 Months, Current Financial Year, Last Financial Year.

Defects & Minor enhancements

- Assessments > Capture Submitted for Approval logs for internal users
- Online enquiries > Assessments for Contacts
- Performance improvement, classifications
- Improvements to Healthlink result matching
- Fix display of errors when copy assessment fails
- Archive/restore entitlement usage.
- Fix crash in professional contact picker when no referral found
- Prevent appointment triggers with non sharable assessments
- Fix Argus regression with correspondence
- Better patient portal setup UX
- Disable preview assessment pdf

6.98.8 Release Notes

Admin > Calendar Sessions > Prefilled dates, locations

When a new calendar session is started, based on your search criteria or other dates passed in this is prepopulated.

The first possible location for a clinician is pre-selected.
