

Manage External Identifiers for Patient

Last Modified on 27/06/2024 12:03 pm ACST

For a number of integrations, it is common that one or more *External Identifiers* may be created by an integration.

In rare cases, a technical support staff member may need to add, remove or edit these identifiers.

For individuals with the role *technical_support*; under Patient > External Identifiers there is the ability to **List, Add, Edit, and Remove** external identifiers

Dashboard / Patients / Test RESIDENT

External identifier

Vendor *

emma

Identifier *

6674d989b0a39b076c67c76c
